

JASVANTH. S

Agentic AI Developer

+91 8098421779 • jasvanth1010@gmail.com • [Portfolio](#) • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Agentic AI Developer pioneering autonomous intelligent systems with multi-step reasoning, persistent memory, and dynamic tool-calling. Deep expertise in LangChain, LangGraph, and CrewAI for building production-grade agent workflows. Experienced in RAG architectures, agentic orchestration pipelines, and LLM-powered applications deployed at scale. Passionate about pushing the boundaries of what autonomous AI can accomplish in real-world environments.

AGENTIC AI STACK

Orchestration Frameworks: LangChain, LangGraph, CrewAI, Agentic patterns

LLM Integration: Llama 3 (Groq), OpenAI GPT, Gemini (Google), Hugging Face, Prompt Engineering, Tool Calling, Open Router

RAG & Memory: Retrieval Augmented Generation, Vector DBs (Pinecone, ChromaDB), Persistent Memory

Agent Patterns: ReAct Agents, Plan-and-Execute, Multi-Agent Coordination, Supervisor Agents

Deployment: FastAPI, Docker, Telegram Bot API, Webhooks, Render

Languages & Tools: Python, JavaScript, TypeScript, Git, Jupyter Notebook, VS Code

FLAGSHIP AGENTIC PROJECTS

Smart Academic Assistance — Dual-Brain Agentic RAG Bot [LangChain, CrewAI, RAG, Llama 3, Groq, FastAPI, Docker, Telegram]

- Engineered a production-ready agentic Telegram bot featuring a dual-brain retrieval architecture: a strict RAG agent over Google Drive documents with intelligent fallback to Llama 3 for open-domain queries
- Designed multi-step reasoning chains with tool-calling for document search, summarization, and conversational memory across sessions
- Achieved 80% reduction in document lookup time vs. manual search; deployed via Docker + FastAPI backend
- Implemented CrewAI-based agent delegation to coordinate specialized sub-agents for different query intents

Health Guardian AI — Agentic Wearable Health Orchestration [Multi-Agent Systems, Federated Learning, Digital Twins, FHIR]

- Researched and architected a multi-agent health orchestration framework integrating digital twins, federated learning, and zero-trust security for continuous wearable health monitoring
- Designed supervisor agent coordinating specialized sub-agents (vitals, alerts, clinical reporting) via LangGraph-style state machines
- Presented at ICSIEKAHE Research Conference; paper documents agent coordination protocols and FHIR clinical integration

SmartFire AI Optimizer — Agentic GIS Optimization System [Agentic AI, GIS, MIP Optimization, Multi-Agent Coordination]

- Built an agentic system coordinating data ingestion, risk modelling, and optimization agents to determine optimal fire station locations using real-time traffic and demographic data
- Presented at TNFS National Conference, VIT Chennai — ranked in Top 23 finalists nationally

Cyber Jarvis — Autonomous Cyber Defense Framework (Research) [Reinforcement Learning, Hybrid AI, Closed-Loop Defense]

- Designed an agentic cybersecurity framework enabling autonomous threat detection, decision-making, and self-healing infrastructure using reinforcement learning and hybrid AI models
- Introduced closed-loop defense architecture that reduces alert fatigue and enables context-aware adaptive mitigation

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern | [Grow Your Skills](#) • Jul 2025 – Oct 2025 • Remote

- Developed LLM-based agentic applications and contributed to autonomous workflow pipelines
- Gained hands-on exposure to production agentic AI system design, tool-calling, and prompt engineering

EDUCATION

B.Tech — Artificial Intelligence & Data Science

2023 – 2027

Arjun College of Technology, Coimbatore **CGPA: 8.21**

CERTIFICATIONS

Gen AI Engineering Mastermind — Outskill (2026)

AI Agents Intensive Course — Google / Kaggle (2025)

Master in Data Science — Udemy (2025)

Oracle Certified Foundations Associate — Oracle University (2025)

RESEARCH PUBLICATIONS

- SmartFire AI Optimizer — AI-Based Fire Station Location Optimization (TNFS National Conference, VIT Chennai, 2026)
- Health Guardian AI — Agentic Wearable Health Orchestration System (ICSIEKAHE, 2026)
- Cyber Jarvis — Autonomous Cyber Defense Framework (Draft, 2026)
- Leveraging AI and Data Science for Small Business Growth (Draft, 2025)

ACHIEVEMENTS

- Top 23 Finalist — TNFS National Technical Paper Presentation, VIT Chennai (2026)
- Presented 'EasyML' — Democratizing AI for Everyone at Smart India Hackathon prelims (2024)
- Speaker at multiple technical events on AI, Data Science, and autonomous systems
